Mental Health Update Call Notes

5/15/2014

1) 19-2524 Update – The last court meeting was canceled so there are no updates on the proposed new 19-2524 format.

2) PASRR Update – Heidi reminded staff that on form 88, the narrative only needs a short summary. Please be brief & to the point dealing with mental health issues only. If anyone has questions, please call Heidi Lasser. The regions requested that Heidi send this information out to the regional staff again. Heidi said that she will send out an update to program mangers & point of contact people.

3) eRMTS Update – No update

4) WITS Release Notes – Reviewed the 15.6 and 15.7 work items that will impact mental health.

5) Alerts Update – Robert updated the regions that he had rebuilt all the alerts in Region 2. 3 of the rebuilt alerts were successful, the rest failed. Robert has escalated this issue to FEi who is currently reviewing all alert types.

6) Medication Duplication – There have been reports of medications being duplicated in the medication dropdown list. Examples of this are: Inderal La 60 mg, and 80 mg, and Inderal LA 60 mg and 80 mg, Seroquel 100, 200, 25, 300, 400, and 50 and Seroquel Tabs 100, 200, 25, 300, 400, and 50 . Robert asked if any of the regions have any objections to expire any of these. The regions suggested expiring 'Seroquel Tabs' as this medication only comes in tabs. Robert will go thru and pull reports over the next few months checking to see what other duplicates show up. Robert will send out updates when necessary.

7) Training Needs – Central office will be looking at the training needs for Mental Health over the next year. Please start looking at what areas your region would like to see trainings on. Feedback will be solicited on the June Mental Health Update Call.

8) Other

SharePoint Site – The regions asked if we could balance the information on share point between CO & regional offices. Robert will pass this request along to Jon Meyer.

Beta UI – The regions asked if there is a date when the Beta UI will replace WITS prime? Robert indicated that there is no firm date at this time, but that is could be sometime in July.

Beta UI –The regions asked if they could get a copy of the Beta UI bug report to see if an issue has been reported. Robert will send reports out to regional office to take a look at.

Beta UI –Some of the regions have reported that the Beta is so slow – slower than the original site. This is possibly due to the DHW using IE8. IT will be updating everyone to IE11 in the coming months which should solve some of the seed issues when using the WITS Beta site in IE.
